

SUMMARY

Data Science graduate with hands-on experience in Machine Learning, Deep Learning, NLP, and Generative AI. Skilled in building and deploying scalable AI applications including RAG-based systems, recommendation engines, predictive analytics models, and NLP pipelines using Python, TensorFlow, PyTorch, LangChain, FastAPI, and Streamlit. Strong foundation in data preprocessing, feature engineering, model optimization, and AI application deployment. Passionate about building scalable AI/ML solutions and seeking opportunities as a Data Scientist, AI/ML Engineer, or Generative AI Engineer.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java
- **Machine Learning:** Regression, Classification, Clustering, Ensemble Learning, Random Forest, XGBoost, LightGBM, KNN, Naive Bayes, PCA, DBSCAN, SMOTE, Cross-Validation, Hyperparameter Tuning, Feature Engineering, Model Evaluation
- **Deep Learning:** ANN, CNN, RNN, LSTM, Transfer Learning, TensorFlow, PyTorch, Keras, Computer Vision, Image Classification
- **NLP & Generative AI:** NLP, Text Classification, Sentiment Analysis, BERT, Transformers, LangChain, RAG Pipelines, Prompt Engineering, HuggingFace, OpenAI API, Groq LLM, Embedding Models, Vector Search, Pinecone, LLM Applications
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, EDA, Data Cleaning, Statistical Analysis
- **Frameworks & Tools:** Scikit-learn, FastAPI, Streamlit, Git, GitHub, Jupyter Notebook, VS Code
- **Databases & Cloud:** MySQL, Pinecone Vector Database, AWS EC2, AWS S3, Cloud Computing Fundamentals
- **Additional Concepts:** MLOps Basics, AI Automation, End-to-End ML Pipelines, Model Deployment, Problem Solving, DSA

PROJECTS

•AI-Powered Medical Chatbot

Generative AI | RAG | LangChain | Groq LLM | Pinecone | HuggingFace | Streamlit

GitHub Repository

–Built and deployed a Retrieval-Augmented Generation (RAG)-based medical chatbot capable of answering context-aware healthcare queries using semantic document retrieval and vector search.

–Integrated Groq LLM, HuggingFace embeddings, LangChain retrieval chains, and Pinecone vector database to improve answer relevance and reduce irrelevant responses by 35%.

–Developed an interactive Streamlit-based AI application enabling real-time conversational interaction and scalable NLP inference workflows.

•AI-Based Personalized Music Recommendation Engine

Machine Learning | Collaborative Filtering | FAISS | Scikit-learn | Python

GitHub Repository

–Developed a hybrid recommendation engine combining collaborative filtering and content-based recommendation techniques to generate personalized music suggestions.

–Implemented FAISS vector similarity search, reducing recommendation retrieval time by 60% on a dataset containing 10,000+ songs.

–Engineered features including genre, lyrics, artist metadata, and audio attributes to improve recommendation accuracy and user personalization.

•Healthcare Predictive Analytics System for Obesity Risk Classification

Machine Learning | LightGBM | SMOTE | Streamlit | Predictive Analytics

GitHub Repository

–Built a multi-class machine learning classification system to predict 7 obesity severity levels using healthcare and lifestyle datasets, achieving 97% accuracy.

–Applied SMOTE for class imbalance handling, improving minority-class F1-score by 18% and enhancing model generalization performance.

–Optimized LightGBM models using cross-validation and hyperparameter tuning techniques, then deployed the solution through a Streamlit web application.

WORK EXPERIENCE

•Data Science Intern

Strydo Technologies Pvt. Ltd.

Tirupati, Andhra Pradesh

Oct 2025 – Jan 2026

–Designed and deployed 5+ end-to-end Machine Learning and Deep Learning pipelines involving classification, regression, NLP, feature engineering, model evaluation, and predictive analytics, reducing manual processing time by approximately 40%.

–Built and fine-tuned deep learning models using TensorFlow and PyTorch, improving predictive performance by 10–15% through hyperparameter optimization and ensemble learning techniques.

–Developed NLP and Generative AI workflows using transformer architectures, LangChain, prompt engineering, and LLM integrations for semantic analysis and automated AI content generation.

–Performed data preprocessing, exploratory data analysis, feature engineering, model optimization, and inference evaluation using Scikit-learn, Pandas, and NumPy across multiple AI workflows.

EDUCATION

B.Tech, Computer Science Engineering (Data Science Specialization)	2021 – 2025
Sree Vidyanikethan Engineering College, Tirupati	CGPA: 8.64 / 10.0
Intermediate – Mathematics, Physics, Chemistry	2019 – 2021
Board of Intermediate Education, Andhra Pradesh	CGPA: 9.6 / 10.0
SSC (10th Grade)	2018 – 2019
Board of Secondary Education, Andhra Pradesh	CGPA: 9.8 / 10.0

CERTIFICATIONS

- IBM Data Science Professional Certificate – IBM (Coursera)
- Google Data Analytics Professional Certificate – Google (Coursera)
- AI Foundation Certificate – Infosys Springboard
- Altair Data Science Master Virtual Internship – AICTE Certified
